to kareem

Dear Accounts Team,

Please be advised that our corporate banking details have been updated effective immediately due to our transition to a new regional banking partner. For all pending and future invoice payments, kindly use the routing and account numbers listed below instead of our previous account file. Attached is the revised invoice reflecting these changes.

Bank: UOB Overseas Bank
Account: 12343567890
Transit: 5555

Please reply to confirm receipt of this update and update your payment portal.

Best regards,

Feizal Hafix

How scammers built a fake Zoom call from real videos of PM Wong and other Singapore leaders

Analysis of full footage shared exclusively with CNA found that the scammers used obscure or dated YouTube videos of high-profile figures, alongside other deceptive techniques, to make their fabricated virtual event convincing.

To make the Zoom call look legitimate, the scammers padded it with extra "participants" who did not speak and whose feeds were found to be playing in a loop. (Graphic: CNA/Teha Muhamad)

Singapore police wrest back $41 million stolen from commodities firm in BEC scam

Authorities have seized more than $41 million stolen from a Singaporean commodities firm in a business email compromise scam (BEC), Interpol announced Monday.

The exceptionally large sum was stolen from the company through a simple but common trick — the impersonation of one of the company's suppliers by changing a single character in the email address. On July 15, the purported supplier requested payment to an account based in Timor Leste, and four days later $42.3 million was transferred.

Only when the real supplier complained about not having been paid did the company realize what had happened.

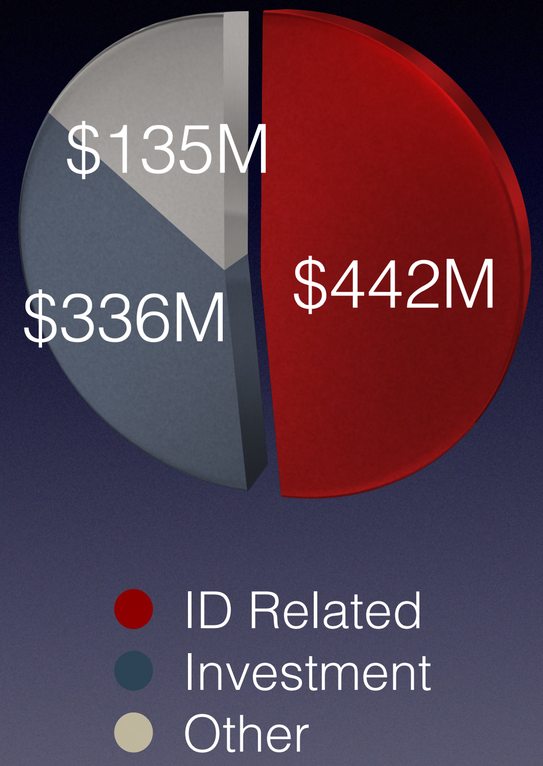
Identity Fraud



- Identity related fraud ~50% to 60% of all cybercrime losses.
- The vast majority of cybercrime isn't sophisticated system compromises, it's **impersonation**.

What if we could not only stop scams, but also make your business more efficient?

Founder: Kareem Shehata

- 5 years advanced cryptography research
- 20+ years Software Engineering Experience
- Wide range of business experience from startups to aerospace

Why I founded Ammit

- We've had identity solutions in academia for *decades*.
- But they haven't been made *practical*.
- **Ammit** Founded to bring advanced cryptographic solutions from the lab into the real world.

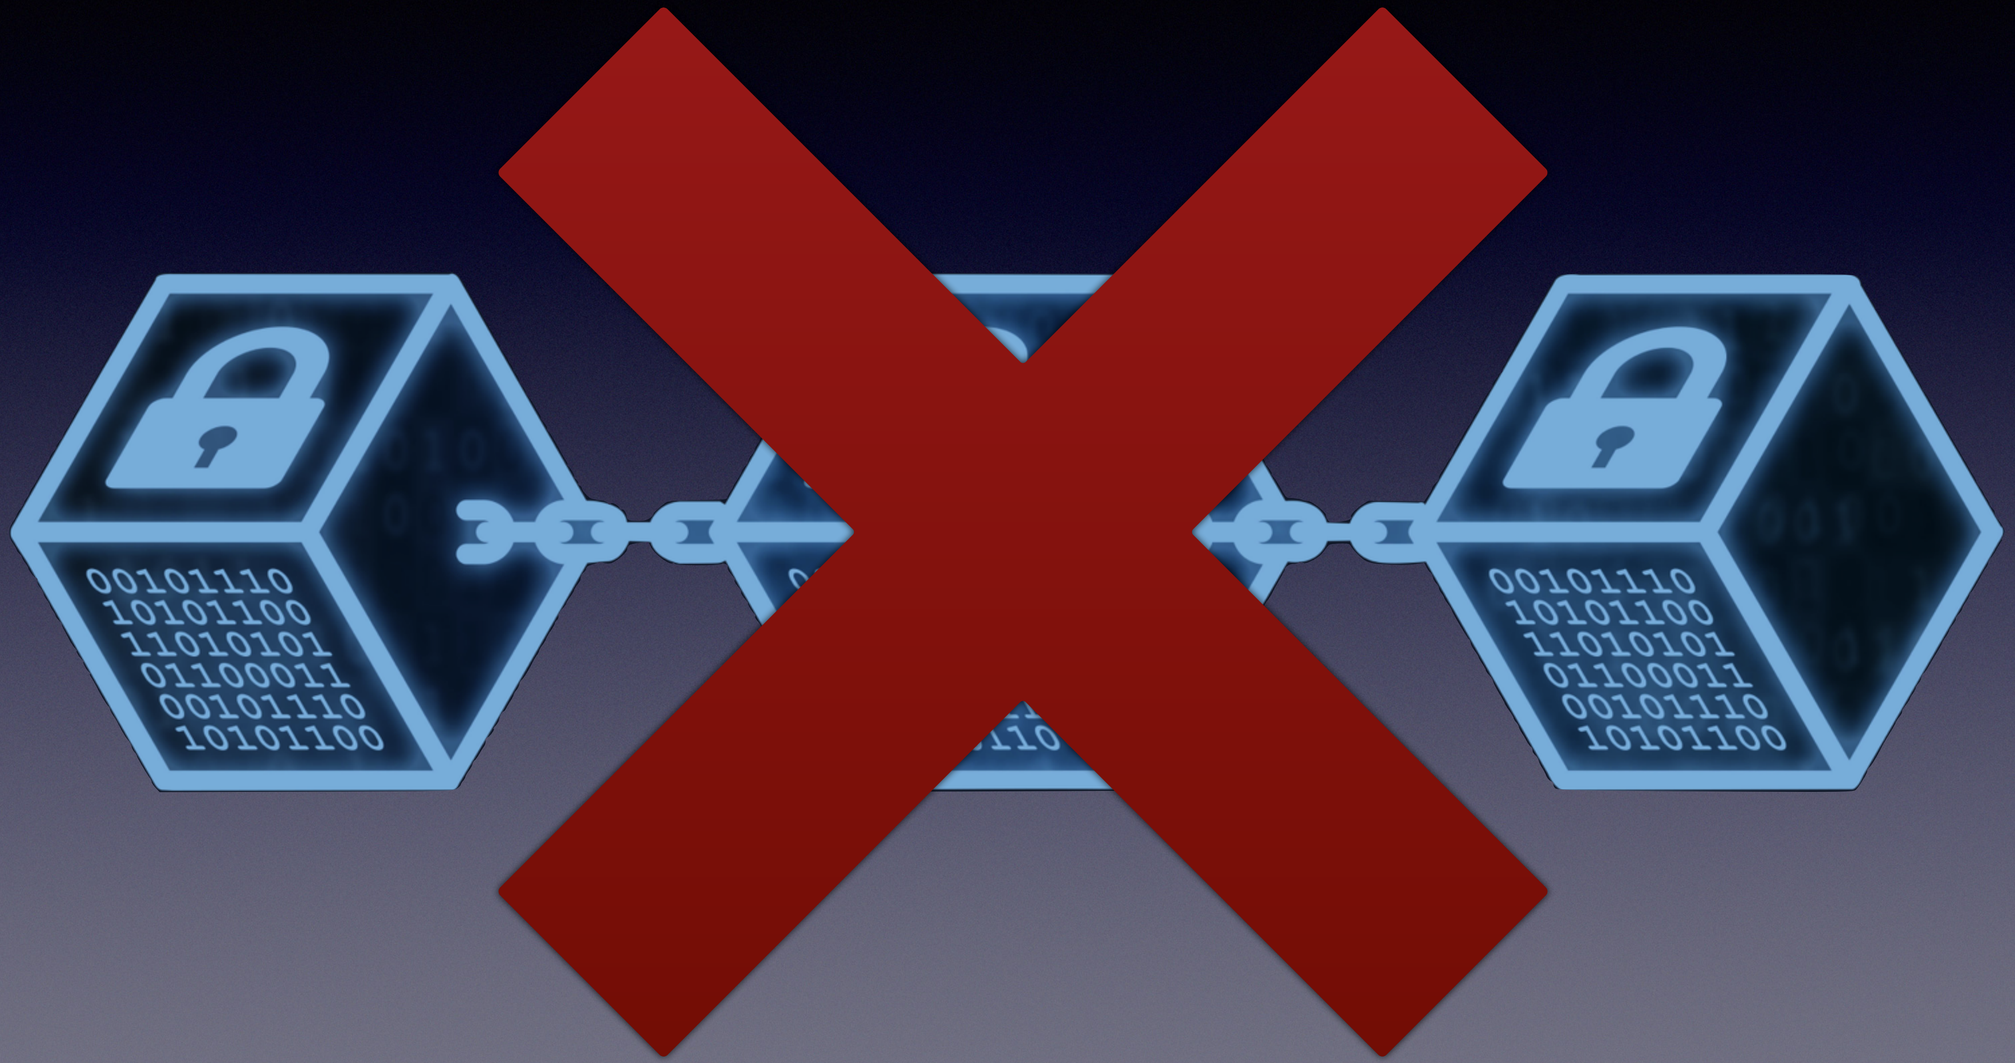
Key Insight: Reauthentication

- Key question is the person I'm talking to *now* the same as the person I talked to *yesterday*?
- In particular: what happens when users change phones or have problems?
- This is the gap the fraudsters use.

Ammit Identity

- Ownership: Put the keys for digital signature in *your* hands.
- Recovery: separate keys for rotation and recovery.
- Multisig: Spread trust over several keys/devices.
- Stability: Single ID throughout.

No Blockchains Required



APAC Market Size Forecast

Business Model

- Credential Wallet: Free app for individuals to store, acquire and present digital credentials.
- Enterprise Services:
  - Credential Issuance
  - Key Backups
  - Document Verification
  - Enterprise Integrations

Current Status

- Building Proof-of-Concept System using Open Source Components, expect to have demo in < 3 months
- Active discussions with customers for first use cases.
- Goal is to demonstrate a deployable system this year and establish improvements in both $$ and efficiency.

Ask 1: Cofounders & Teammates

- Chief “Customer Success”
- CTO / CSO
- UX, SWE, etc

Ask 2: Potential Customers

- Actively seeking potential customers & first use cases
- High value, identity sensitive, indirect-customer
- e.g. Insurance, medium-sized FI
- Looking for non-technical decision makers

Ask 3: Funding

- $500k (SGD) Seed Round (SAFE)
- Gives 6 to 12 months of development time to build and test PoV
